| 10% | 60% | >95% | >95% | 60% | 20% |

**Forecast for Tuesday 23 Jan 2024**

**Weather:** A mostly cloudy start with outbreaks of rain soon reaching western hills, the rain, falling briefly as sleet or wet snow on the higher summits, then spreading east through the morning and becoming heavy at times. The rain continues through the afternoon, with conditions underfoot very wet due to the current and recent rainfall, before clearing eastwards through the late afternoon and evening with occasional showers and clear spells following, the showers perhaps turning wintry towards midnight on the highest summits

**Chance of cloud-free hill tops above 800m:** Around 75% at first but falling to zero through the morning, chances improve again later.

**Low Cloud and visibility:** Occasional cloud above about 600-750m at first, and again in evening, becoming more persistent through the morning and lowering to 450m at times with patches below. Away from cloud visibility good or very good falling to just a few kilometres in heavier rain, and any summit wintriness.

**Level above which ground is expected to be frozen/snow is expected to settle.*

**Meteorologist's View**

Winds strengthening through the day with gusts around 85mph expected over ridges and summits by early afternoon. Significant chill effect, enhanced by the heavy rain, despite relatively mild temperatures.

**Forecast for Wednesday 24 Jan 2024**

**Weather:** Clear or sunny spells and a few morning showers, perhaps wintry on the higher summits, but the afternoon looking dry.

**Maximum wind:** Westerly 40-50mph, gusts around 80mph over ridges and summits, gradually easing 25mph, gusts around 40mph, by early afternoon, then backing southerly 10-15mph through the evening.

**Chance of cloud-free hill tops above 800m:** Around 75% through the morning improving close to 100% in afternoon.

**Low Cloud and visibility:** Occasional cloud above 600-750m through the morning, the cloud lifting above the summits for the afternoon. Away from cloud, visibility very good, falling to just a few kilometres in any summit wintry showers.

**Temperature:** **Valleys:** Around plus 6 or 7 Celsius at dawn rising to plus 10 Celsius
**At 800m:** Around plus 4Celsius falling to plus 1 Celsius by evening
**Freezing level:** Above the summits slowly falling to 900m
